

To: **Brian.Soerensen@europe.lego.com**

Hi Brian,

Here is an overview of what we currently have:

I am Stewart Green, My family and I run a number of business's.

For example:

Stewart Green T/A Data Design Systems a sole trader company going since 1983

Data Design Interactive Ltd – a limited company set up 2 years

DATA DESIGN STUDIOS Ltd – a limited company – not trading

DATA DESIGN Audio Visual Ltd – a limited company – not trading

Art World (UK) Ltd – a limited company – to do graphics work, set up about 6 months ago

All of these companies are 100% owned and controlled by either myself or my direct family, but they all run independently of each other.

Lego has a contract with Data Design Interactive to program 'ROCK RAIDERS'

Lego has a contract with ARTWORLD (UK) to write animation sequences for 'LEGO CHESS'
(we are also doing the LEGO COMIC for EGMONT)

We have just taken on new accountants and they are helping us to restructure the company to make it more efficient and streamlined. We are trying to simplify our accounts, get more organised and create a single strong focus of the company by doing the following.

We have set up a new company '**GREEN SOLUTIONS Ltd**' this is jointly owned by myself, My wife and three children.

This will be the main holding company for the group. All contracts will be signed through this company. Then the work will be sub-contracted out to our associated companies.

'Data Design Interactive Ltd' will be wound up and used as a trading name only.

The name 'DATA DESIGN STUDIOS' and 'DATA DESIGN INTERACTIVE' will be wound up and operate as trading names only.

All of the staff have been moved over to GREEN SOLUTIONS Ltd or ARTWORLD (UK)Ltd
